

Critical Difference - migraine AUROC (Friedman p = 0.0551, n_cells = 9)

Mean rank (rightmost = best)

17 16 15 14 13 12 11 10 9 8 7 6 5 4 3 2 1

CD = 8.23

Excluded from Friedman (incomplete cell coverage): tabpfn:v2-5-auto

Each method is ranked 1 (best) to 17 within every cell, then averaged over the 9 cells to give its mean rank (dot). Methods joined by a bar differ by less than the critical difference CD (Nemenyi post-hoc, alpha=0.05) and are therefore not significantly different.
